

Data Privacy & Our Organization

Navigating FOIPOP, PIPEDA,
& 2026 Security Risks

What is PII?

Any data that can be used on its own or with other information to identify, contact, or locate a single person.

- Full Name
- Home Address(es)
- Social Insurance Numbers
- Financial Information
- Digital Identifiers

If you wouldn't want it public, it's likely PII.

FOIPOP

Nova Scotia

PIPEDA
Canada

The logo features a large blue circle containing the text "PIPEDA" in bold white uppercase letters and "Canada" in a white italicized serif font. A small purple circle is positioned at the bottom-left edge of the blue circle.

Email Etiquette

The 'Front Page' Test

Never send an email or message you wouldn't want printed on the front page of a newspaper.

FOIPOP Readiness

Emails and Chats can be made public through FOIPOP requests.

Safety First

- Double-check your 'To', 'CC', 'BCC' fields to make sure the emails are correct.
- Do not use 'Reply All' unless necessary, especially when discussing sensitive information.
- Avoid emailing sensitive information whenever possible.

AI Risks

AI Leaks

On average, Canadian companies spend \$3.96M on breach remediation, that number rises to \$4.63M when AI is involved.

IBM's 2025 Breach Report*

AI Training

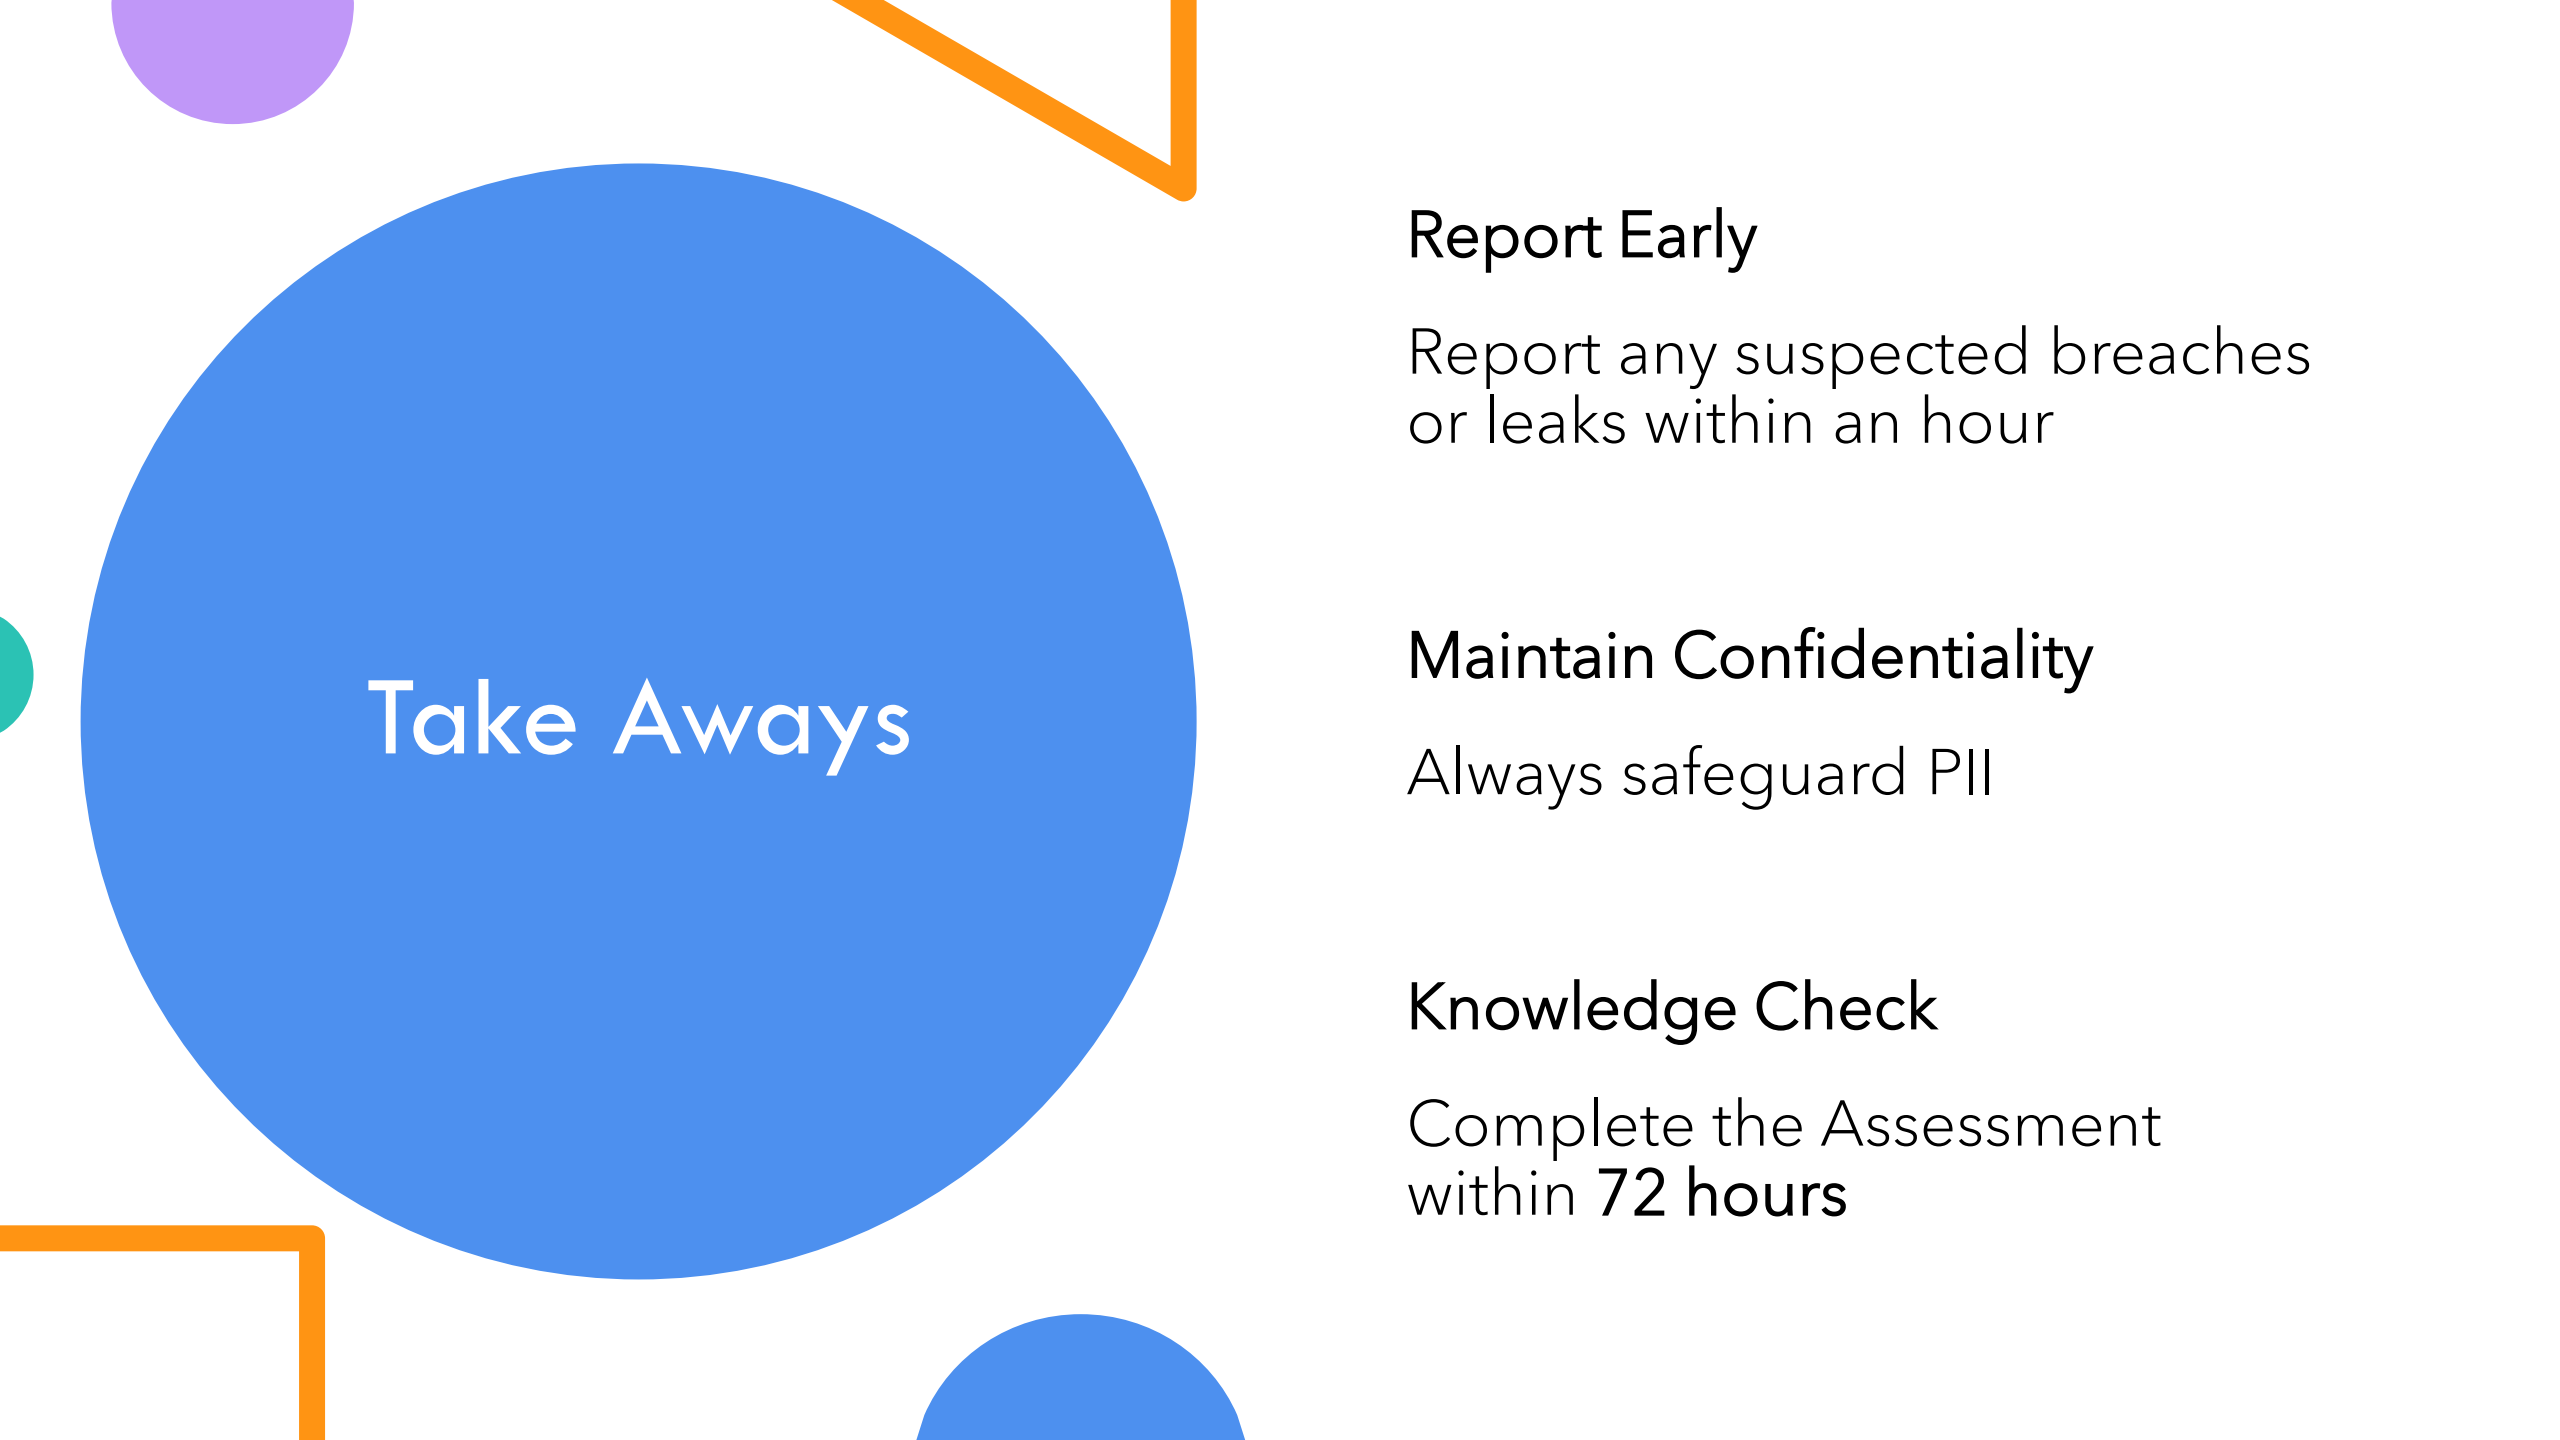

Any data given to a public AI/LLM can be used for training purposes, which means private data can be made public if it's uploaded.

For work purposes, only the approved enterprise AI should be used.

Best Practices

- Lock your workstation anytime you leave your workstation
- Never reuse or share a password. If someone needs access to a system you use, they should be issued their own account
- Keep documents with PII secured, never leave them on your desk
- Always shred confidential or sensitive documents

Take Aways

Report Early

Report any suspected breaches or leaks within an hour

Maintain Confidentiality

Always safeguard PII

Knowledge Check

Complete the Assessment within **72 hours**
